

<b>Supplementary Table 14</b>		
<b>Degree of knockdown</b>	<b>Not significantly downregulated</b>	<b>Significantly downregulated</b>
<b>&lt; 33% knockdown</b>	6754	1939
<b>33% – 66% knockdown</b>	1145	791
<b>&gt; 66% knockdown</b>	245	117

Supplementary Table 5 number of predicted genes splitted into terciles according to the degree of knockdown.
