

Supplementary Figure 5

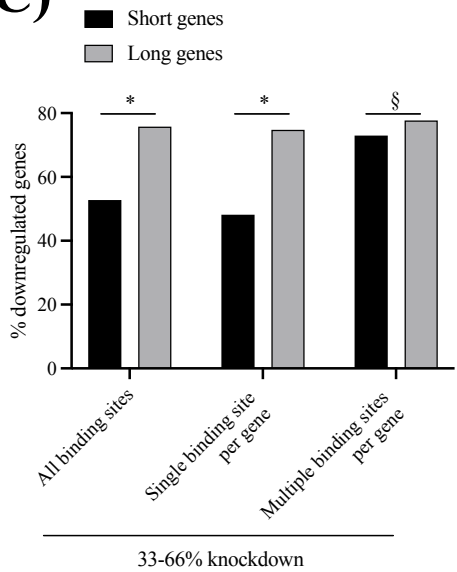

A)

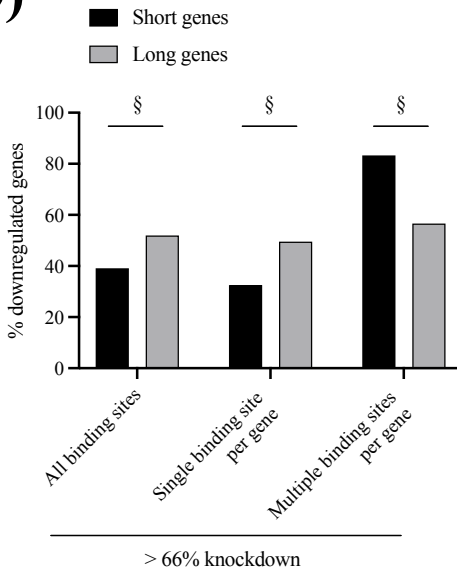

B)

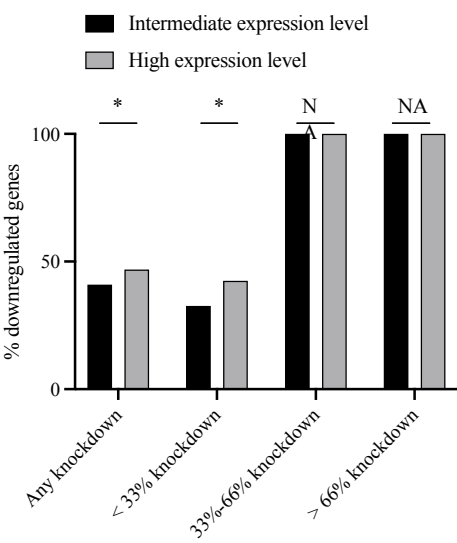

C)

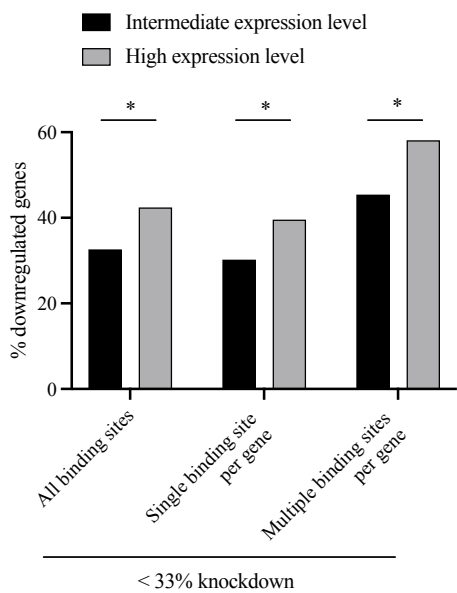

D)

E)

F)

Supplementary Figure 5 shows analyses within the subgroups defined by the degree of knockdown. Therefore, the complete set of genes (any knockdown) was splitted into terciles accoring to the degree of knockdown for additional analysis within theses subgroups. Comparisons between short and long genes are depicted in A)-D) and comparisons between genes with intermediate or high expression are depicted in E) and F).
